

Canada South Science City  
Fund-Raising Appeal  
Spring 2009

Dear friends,

*It is the mission of Canada South Science City (CSSC) to foster the discovery and understanding of science in southwestern Ontario. It seeks to fulfill its mission through interactive, hands-on exhibits on basic science as well as on applications of science to critical issues to our lives today. It also supplements school science curricula and hosts tours from area schools and day camps during vacation periods. It encourages interaction of the public with internationally-known researchers through its series of Science Cafés, sponsored jointly with the Faculty of Science of the University of Windsor.*

*In an age of rapidly advancing science and technology, when the public needs increasing science awareness to make sound critical decisions facing our society, and when we should be training ever more scientists and engineers for future jobs, we find polls indicating an astounding lack of understanding in areas of science, and enrolments in technical areas that are stagnating. We simply have to find ways to reverse these trends, and the CSSC can help!*

*CSSC is a much needed family entertainment and education centre that promotes science and enriches our community. Its programs can spark lifelong interest in science. It receives very little government support and its door receipts, if entrance is to remain affordable, are hardly sufficient to keep the doors open. It needs your help to grow and expand.*

*Please consider making a generous, tax-deductible donation. You can sponsor an exhibit for one year for as little as \$500, or you can bring joy to hundreds of cash-constrained families by sponsoring a free-admittance day for \$2000. Donations of \$100 or more will be recognized on our new Tom Toth Wall of Giving. Many thanks for whatever you can give!*

*Sincerely,  
Bill Baylis, President of the Board of Directors, CSSC*
