Engage your mind at our next *Science Café* – a free discussion of important science research for the general public, at 7:30 PM on the third Wednesday of the month from October to June in the café of Canada South Science City. Co-sponsored by the Faculty of Science, University of Windsor.

**New Advances in Asthma Care**

**Dr. Shahin Zanganeh MD, FRCPC**

Asthma is a chronic inflammatory disease of the airway. It is a common condition with a prevalence of 14-15% in the general population in Ontario. Left untreated, it can lead to significant mortality and morbidity. It is the topic of the Science City's next science café on Wednesday evening, November 20, 2013.

In the café, Allergist and Clinical Immunologist **Dr. Shahin Zanganeh** will go over the pathophysiology of asthma as well as concepts of bronchial airway remodelling in asthma. He will also present information on new and advanced treatments that are now available for asthma. These include new combination treatments, inhaled steroid pro-drugs available to treat asthma, and monoclonal antibody treatments as well as bronchial thermoplasty.

**7:30 PM Wednesday, November 20, 2013**

in the Canada South Science City Café, 930 Marion Ave., Windsor, ON

As usual at Science Cafés, the presentation is fairly informal with time for discussion. Light refreshments will be served and there is no admission charge. The next regular Café is scheduled on Wednesday, December 18, 2013.
